

FREE PRINTABLE FIELD NOTE | 30 DAYS

Pet behavior observation checklist.

No diagnosis required, no labeling needed, just record-keeping

Notice ordinary patterns in diet, sleep, social responses,
stress signals, and play or enrichment preferences.

PET	SPECIES	START DATE

HOW TO USE THIS FIELD NOTE

Observe the ordinary. Record the context.

Choose one consistent time each day. Record what you directly noticed, not what you think the behavior means. Short, specific notes are more useful than perfect completion.

01 DESCRIBE

Write the visible action: ate half the meal, slept near the door, moved away, returned to play.

02 ADD CONTEXT

Note what happened just before, who was present, where it occurred, and how long recovery took.

03 STAY NEUTRAL

Avoid labels such as stubborn, dominant, jealous, bad, or dramatic. Record what changed instead.

No diagnosis required, no labeling needed, just record-keeping

This checklist can support clearer conversations with caregivers and professionals. It cannot diagnose a health or behavior condition.

WHEN TO SEEK HELP

Contact a veterinarian for sudden or marked behavior change, suspected pain or illness, persistent appetite or sleep disruption, self-injury, severe distress, or behavior that could injure a person or animal.
